## IO952NI

## General

IO952NI is the new twin input/output unit which provides the function of two Input/Output units within one enclosure. the tow units are electrically independent of each other. There is a DIL switch on each unit to set the address. Both units provide supervision of one or more normally open contacts connected to a single pair of cables and a set of changeover relay output contacts.

## Mechanical Construction

The IO950NI is available in the new faceplate style enclosure. It is designed to be surface mounted to the wall and consists of 3 parts:

- a back box with knock-outs for cable entry
- a PCB assembly
- a protective front cover

## Ease of Installation

Improved design for ease of wiring meaning faster installation - unit can be fitted to back-box before wiring is connected. Colour coded terminal blocks for easier identification (green for loop wiring, yellow for mains wiring, grey for inputs and low voltage relays).

## IO952NI

Apollo Twin IO Unit (SA4700-104)

## Technical Specifications

Electrical

| Operating voltage | 17 to 35 VDC |
| :--- | :--- |
| Protocol voltage | $5-13 \mathrm{~V}$ peak to peak |
| Output |  |
| Output type and rating | Relay 1 A at 30 VDC or VAC |
| Physical |  |
| Physical dimensions | $150 \times 90 \times 60 \mathrm{~mm}$ |
| Net weight | 281 g |
| Environmental |  |
| Operating temperature | -40 to $+70^{\circ} \mathrm{C}$ |
| Relative humidity | 0 to $95 \%$ noncondensing |
| Environment | Indoor |

Standards \& regulation
Certification CPR, EN54-17, EN54-18
Current consumption

| Power-up surge | 0.9 mA |
| :--- | :--- |
| Quiescent | 0.5 mA |
| LEDs disabled (max.) | 0.5 mA |
| Alarm (LEDs On) (max.) | 3.5 mA |
