

TVRmobile 2.0

TruVision™ TVRmobile 2.0 application

Overview

You want to keep an eye on your security setup no matter where you are. TVRmobile provides users the ability to do just that – both in live and recorded view.

As an application for smart phones, TVRmobile allows security managers and home owners to access their TruVision recorders and IP cameras remotely by connecting directly to the device.

As a result, it becomes possible to monitor your home, office or store no matter where you are.

A full feature set at your fingertips

TVRmobile 2.0 provides an enhanced user experience, with features such as drag & drop, swipe, on-screen PTZ control and many more. Its intuitive user interface allows you to retrieve required video footage, more easily than ever before. Another neat feature is the ability to control recorders' relay outputs through TVRmobile. This enables users to perform actions such as sounding an alarm or opening doors and gates.

Smart phone support

TVRmobile is available for a wide range of smart phones running iOS, Windows or Android operating systems. The application is available – free of charge – on the iTunes, Windows Phone and Google Play web stores.

Ease of installation

This application provides you with an intuitive interface that allows to set up this license free application by a few touches of your fingers. Download the application from the relevant web store and simply install the application.

After installation, connect to the device by adding the correct IP address and your system is ready to go.

Additionally, you have great features available such as saving your favorite presets, allowing you to quickly connect to whatever camera or recorder you prefer.

Standard Features

- Supports iOS, Windows & Android tablets & smartphones
- Up to 100+ devices can be added to the application
- Up to 16 cameras can be viewed simultaneously (tablets)
- Control PTZ cameras
- Remote connection via WIFI, 2G, 3G or 4G network
- Allows for high resolution image viewing
- Manage Favorites; define specific cameras or devices as favorites to quickly connect them
- Store custom views using bookmarks; define specific camera combinations and views and store them for easy recovery
- Application recognizes landscape and portrait orientation of mobile devices and adjusts accordingly
- Supports latest TruVision recorders
- Supports latest TruVision IP cameras & encoders
- Devices to be connected require an H.264 encoder as well as dual stream support
- High resolution streaming of live & recorded video
- Control DVR/NVR relay outputs (Android & iOS)
- Drag, drop & swipe controls
