

Wi-Fi Panoramic Wedge Camera

IP Open Standards Cameras

OVERVIEW

The TruVision® IP Megapixel Wi-Fi Panoramic Wedge Camera from Interlogix offers state-of-the-art, high-definition images utilizing panoramic technology. Providing a 160 degree horizontal field-of-view, with no de-warping required, makes this camera ideal for challenging locations where one camera is needed to cover a wide area. The optional Dual View Mount can also provide the ability to mount two Panoramic Wedge Cameras back-to-back for increased wide-area coverage.

The Wi-Fi Panoramic Wedge Camera is also based on the Wi-Fi® standards of IEEE802.11b/g/n and operates in the 2.4Ghz range where running cable is not feasible. Transmission rates of up to 150Mbps are supported and secure wireless communication is achieved via 64/128-bit WEP, WPA/WPA2, WPA-PSK/WPA2-PSK and WPS wireless encryption standards. An integrated browser and micro SD memory card storage capability simplifies remote, live monitoring/playback of edge-recorded audio and video. Memory card recording also protects data in the event of network disruptions. The Wi-Fi Panoramic Wedge Camera also adheres to ONVIF® standards as well as supports CGI command set for simple integration into any standard IP system.
