UltraView™ 650TVL Box Camera

Introduction

The UltraView™ 650TVL box camera is a video surveillance camera, which provides a crisp 650TVL high resolution and excellent 0.08 lux sensitivity. Furthermore, its Adaptive Tone Reproduction (ATR) function improves contrast in bright/dark areas of the image in single shutter exposure.

Its Digital Image Stabilizer (DIS) function suppresses the image shaking that can occur when cameras are mounted outdoors, in higher locations, or areas subject to vibration.

The UltraView™ box camera is designed for most indoor and outdoor circumstance with its advantages of high resolution and well-balanced spectral sensitivity, without compromising saturation and color accuracy. The IR cut filter along with intelligent algorithms optimize the Day/Night switch performance and eliminate annoying back-and-forth cycles under challenging lighting conditions.
