TVR-1608-4T
TruVision™ DVR 16, HD-TVI Hybrid 8 channel recorder, 4 TB

Why the TVR 16?

The TVR 16 recorder series offers a full-featured, flexible hybrid recording solution that is ideal for (gradually) migrating an old analog video system to a modern high-resolution video system.
The TVR-1608 is a cost-effective recorder capable of recording up to 8 cameras.
As a true hybrid recorder, the TVR 16 can be used with analog, HD-TVI and IP cameras.
The recorder also supports HD-CVI (up to 4 MP) and HD-AHD (up to 5 MP) cameras.
This hybrid recorder is uniquely qualified to upgrade existing analog installations, offering a competitive, feature-rich and practical solution for the market of HD analog, standard analog and hybrid recorders.

Open technology with powerful encoding

Using the open HD-TVI technology, TVR 1608 can connect to any HD-TVI camera up to 8 MP (4K) over existing coax cable.
As well as HD-TVI, TVR 16 also connects standard analog cameras and allows you to reuse existing analog cameras that do not yet need to be replaced/upgraded.
Finally, TVR 16 is capable of connecting all of its channels on IP cameras (up to 4K (8 MP)), making this is a true HD Hybrid series.
The TVR 16 can use H.264 or H.265 encoding for analog, HD-TVI and IP cameras.
HD-CVI and HD-AHD cameras are supported in H.264 encoding.

Unique intrusion integration

TVR 16 offers free integration with IP intrusion panels (Carrier) for video verification of (alarm) events. Alarm and arming/disarming events are sent from the intrusion panel to the recorder and can trigger actions in the recorder (recording, output control, PTZ control, email) and/or send notifications to TVRMobile or TruVision Navigator. The communication between recorder and panel is also monitored.

Applications

The TVR 16 is suited for upgrading small sized analog video systems in (commercial) applications (residential, small offices, small shops) where high quality video is important without expensive cable costs.
