

## Product Data Sheet

# DF863

## Splice and Terminator Kit for microphonic cable (DF851)

The Cable splice/ Terminator kit can either be used to terminate the end of microhonic cable or as a junction between cables. As a cable terminator it is a moisture proof termination device that enables the supervision current to pass through the sensor cable. It is installed at the end of the sensor cable farthest from the processor. A terminal block included with every kit ensures connector integrity when used as either a terminator or a splice.

### Standard Features

- All weatherproof seal
- Easy to use/reuse
- Can be a terminator or a junction
