Product Data Sheet

DF955-SW

Network Manager software for fence protection (CD)

The Network Manager software (DF955-SW) initiates and controls all communications over FlexPS network and provides the interface for sensor alarm
reporting and system management.
The Network Manager (NM) is a Windows-based software package that can reside on the same PC as the SMS (Security Management System) or on a dedicated PC. The physical connection of the NM to FlexPS processor (network enabled) is through the Silver Network Interface Unit (DF955-U).

Standard Features

- Windows-based SW

- Supports remote connection to Universal Configuration module (UCM)

- Provides management tools (Plot tool, Status tool, Event
Log tool) for centralized
system monitoring and configuration capabilities

- Includes SDK with complete API documentation, test software and network manager simulator

- Redundant configuration option for critical applications

DF955-SW

Network Manager software for fence protection (CD)

Specifications

Ordering Information

Part No.	Description
DF955-SW	Network Manager software for fence protection (CD)
DF955-U	Fence protection Network Interface Unit
DF955-C1	Multi-mode fiber optic (MMFO) comm card for fence protection network option for FlexPS processor
DF955-C2	EIA-422 copper comm card for fence protection network option for FlexPS processor
DF951	Single / dual Zone FlexPS processor in outdoor resistant enclosure, 12-48 VDC
DF950-CM	Universal Configuration Module (UCM) Software kit with interface cable
