

Product Data Sheet

LC1502

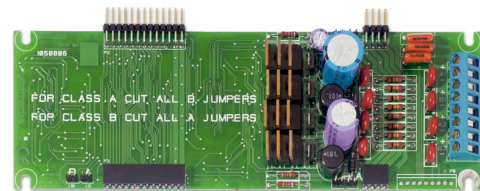

2-loop extension board for 1200/2000 series fire panels

General

The LC1502 is a loop extension board for 1200/2000 series fire panels. It allows for 2 class-A or 4 class-B loops to be added to the fire panel, and supports up to 128 addressable loop devices per loop.

Protocol Support

The LC1502 supports the Aritech 2000 series and 900 series addressable protocols.

Standard Features

- 2 Class-A or 4 Class-B loops
- Up to 128 devices per loop (protocol dependent)
- Supports various detector protocols
- No hardware address required

LC1502

2-loop extension board for 1200/2000 series fire panels

Specifications

Current consumption	
Quiescent @ 24 VDC (Fully equipped loop) + 150 mA (252 detectors)	
Loop capacity	
Class-A	2
Class-B	4
