Product Data Sheet

TX-4131-03-2
4 button keyfob 868 MHz Gen2

The 4-button keyfob is a portable wireless device allowing the customer to arm or disarm their system
without having to memorise access codes or race to beat entry or exit delays. It offers two additional programmable buttons which can be used to turn on and off lights before entering the premises, activate automated garage door, X10 appliances or any other function defined in the system. It can also be used to send a panic alarm by pressing the lock
and unlock buttons simultaneously.

Standard Features

- Learn-mode technology
- Full arm, part arm and disarm plus two additional programmable buttons
- Four colour coded ribbon rings for user personalisation

TX-4131-03-2
